

KAROL

The Karol footstool enhances the functionality of the model, offering added comfort and versatility.

The purpose of the footstool is to add more comfort to rest. It can be an additional seat, as well as a replacement for the coffee table. The Karol footstool is large and comes in handy for everyday use as well as during the holidays when having company.

Relax in even greater comfort with the Karol footstool!

For the corner sofa, the large Karol footstool, attached to the seat, expands the resting area, while for the straight version, placing it near the seat transforms it into a comfortable ottoman. The footstool's seat filling matches that of the Karol sofa, consisting of two layers of polyurethane foam: high comfort

and high resilience. Elastic and comfortable, it perfectly complements the sofa and is used separately. Thanks to the height of the legs, any robot vacuum cleaning devices will be completely unobstructed.
