

LOTTIE

The Lottie is a stylish and compact sofa which prioritizes comfort among all else.

The Lottie was designed as a light and comfortable solution for small-sized living. No armrests make it possible to harmoniously fit this sofa into the interior and save valuable meters of free space.

Lottie sofa – compact, stylish, comfortable!

Transformation
mechanism

The Lottie is a folding sofa, and while compact, it does not affect the comfortability of the sleeping space. The “stepping” transformation mechanism makes it easy to unfold the sofa, turning it into an everyday bed. With a gentle nudge the seat moves forward, slowly dropping onto the chrome legs.

By lowering the back of the sofa you get a sleeping place size 1500(1600)x2010 mm. A storage compartment under the seat provides a convenient space to keep home textiles neatly organized.
